Histochemical Journal **25**, 896–898 (1993)

INDEXES TO VOLUME 25

Subject index

The abbreviations R and SC in parentheses indicate a Review and Short Communication respectively.

Abstracts, Royal Microscopical Society 583
Abstracts, Czech Society of Histochemistry 876
Acetylcholinesterase 213
Acid phosphatase 119, 448, 562
Adenocarcinomas 228
Adrenal gland 384
AgNORs 123, 548
Aldose reductase 649
Alkaline phosphatase 430
Amino acid oxidase 578
Amyloid P 219
Anionic sites 367, 401
Aromatic amino acid decarboxylase 51
ATP assay 407
ATPases 319, 430, 502, 531
Autometallography 107, 446
Autonomic nervous system 213

Basement membranes 464, 562
Bile duct 807
Biogenic amines 213
Bioluminescence 407
Bladder 30, 51, 464
Blood group antigens 228, 242, 339, 452
Blood-retinal barrier 649
Bone 140, 446
Bone marrow transplantaion 593
Book Reviews 93, 94
Botanical histochemistry 872(SC)
Brain 319, 329

Caecum 304
Calcium 183, 312, 446
Carbohydrate antigens 339, 452, 619, 628
Carbohydrates 95
Carbonic anhydrase 304, 502, 531
Cartilage 166
Catalase 119
Cell adhesion molecules 469(R)
Cell cycle 173, 548, 843(R)
Cell death 478
Cell function and biology 531(R)
Cell injury 376, 438, 762
Cell ploidy 30
Central nervous system 144, 319, 746
Centromeres 173
Cervix 191, 228, 407
Cholinesterase 112
Chondroitin sulphate 64
Chromosomes 30, 173
Chronic hybernating myocardium 312
Chymase 516
Collagens 523, 821
Colloidal gold labelling 45
Confocal microscopy 173, 726, 746
Congenital nephrosis 606
Connective tissue 821
Cornea 438
Crystalloid inclusions 19
Cyclic 3′,5′-nucleotide phosphodiesterase 348
Cytokines 762
Cytoskeleton 678
Cytotoxicity 376, 772

Dental tissues 523, 781(R)
Digestive system 430
Digital fluorescence microscopy 173
Dipeptidyl peptidase II 119
DNA probes 421
DNA sequences 173
Dopamine β-hydroxylase 51, 509
Dorsal root ganglia 107
Double-labelling techniques 1(R), 14
Dyes 821
Dystrophin 554

Embedding techniques 401, 670
Embryogenesis 299, 464
Embryonic stem cells 452, 628
Endocrines 807
Endocytotic pathways 133
Endothelium 291, 339, 649, 726
Enkaphalins 144
Enterocytes 19
Enzyme kinetics 199, 206, 329(R)
Enzyme replacement therapy 593
Eosinophils 762
Epidermal growth factor 613
Erythropoiesis 280
Erythroid cells 421
Eye 438, 649

Fibrocytes 531
Fish 430
Fixation 123, 719, 735, 854, 865
Flight muscle 478
Fluorescence ratioing 746
Follicle-associated epithelium 502
Freeze substitution procedures 357
Fucose expression 619

Index to Volume 25

A rapid and simple staining method, using Toluidine Blue, for analysing mitotic figures in tissue sections, Chieco, P., Pagnoni, M., Romagnoli, E. and Melchiorri, C., 569
A new polychrome stain and simultaneous methods of histological, histochemical and immunohistochemical stainings performed on semithin sections of Bioacryl-embedded human tissues, Scala, C., Preda, P., Cenacchi, G., Martinelli, G. N., Manara, G. C. and Pasquinelli, G., 670
A quantitative histochemical procedure for the demonstration of purine nucleoside phosphorylase activity in rat and human liver using Tetranitro BT and xanthine oxidase as auxiliary enzyme, Frederiks, W. M., Bosch, K. S. and Van Gulik, T., 86
A histochemical and immunohistochemical study of digestive enzymes and hormones during the larval development of the sea bream, Sparus aurata, L., Sarasquete, M. C., Polo, A. and Gonzalez de Canales, M. L., 430
A monoclonal antibody distinguishes growth cartilage from other types of cartilage: a new probe for osteogenic cartilage, Okihana, H. and Shimomura, Y., 166
Adenosine triphosphate-lead histochemical reactions in ependymal epithelia of murine brains do not represent calcium transport adenosine triphosphatase, Cardy, J. D. and Firth, J. A., 319
Advantages of histochemistry for the study of cell biology, Spicer, S. S., 531
An immunohistochemical study examining the role of collagen type VI in the rodent periodontal ligament, Sloan, P., Carter, D. H., Kielty, C. M. and Shuttleworth, C. A., 523
An immunohistochemical and electron microscopic study of the peri-ureteric ganglia of the guinea-pig, Mitchell, B. S., Pardoe, H. and Stauber, V. V., 509
Analysis of cell ploidy in histological sections of mouse tissues by DNA-DNA *in situ* hybridization with digoxigenin-labelled probes, Keighren, M. and West, J. D., 30
Analytical ultrastructural investigation of microliths in salivary glands of cat, Triantafyllou, A., Harrison, J. D. and Garrett, J. R., 183
Anionic sites in glomerular basement membrane of rats with serum sickness nephritis: quick-freezing and deep-etching study, Duan, H.-J., Ohno, S. and Shigematsu, H., 367

Biochemical verification of quantitative histochemical analysis of succinate dehydrogenase activity in skeletal muscle fibres, Powers, S. K., Lieu, F.-K., Criswell, D. and Dodd, S., 491

Carbohydrate antigen expression in murine embryonic stem cells and embryos. II. Sialylated antigens and glycolipid analysis, Kimber, S. J., Brown, D. G., Påhlsson, P. and Nilsson, B., 628
Carbohydrate antigen expression in murine embryonic stem cells and embryos. I. Lacto and neo-lacto determinants, Brown, D. G., Warren, V. N., Påhlsson, P. and Kimber, S. J., 452
Cationic gold staining of glomerular anionic sites in archived tissue, reprocessed from paraffin wax into LR gold resin, Goode, N. P., Shires, M., Aparicio, S. R. and Davison, A. M., 401
Cellular sialoglycoconjugates: a histochemical perspective review, Roth, J., 687
Combination of non-specific cholinesterase histochemistry and immunofluorescence staining for the study of the sensory innervation of skin and muscle, Dubový, P., Rosario, C. M. and Aldskogius, H., 112
Comparative immunohistolocalization of carbonic anhydrase isozymes I, II and III in the equine and bovine digestive tract, Sasaki, K., Igarashi, S.-I., Amasaki, T., Amasaki, H., Nishita, T., Kano, Y. and Asari, M., 304
Congenital nephrosis of the Finnish type (CNF): matrix components of the glomerular basement membranes and cultured mesangial cells, Ljungberg, P., Jalanko, H., Holmberg, C. and Holthöfer, H., 606
Cytochemical localization of cyclic 3′,5′-nucleotide phosphodiesterase activity in the rat olfactory mucosa, Asanuma, N. and Nomura, H., 348

Dentine proteoglycans: composition, ultrastructure and functions, Goldberg, M. and Takagi, M., 781
Development of the endocrine cells in the rat pancreatic and bile duct system, Park, I.-S. and Bendayan, M., 807
Differences in erythropoiesis in normal chicken and quail embryos, Geert, W. J. C., Lamers, W. H. and Moorman, A. F. M. 280
Detection of glycosaminoglycans on the surface of human umbilical vein endothelial cells using gold-conjugated poly-L-lysine with silver enhancement, Klein, N. J., Shennan, G. I., Heyderman, R. S. and Levin, M., 291
Differentiation of silver-enhanced mercury and gold in tissue sections of rat dorsal root ganglia, Schiønning, J. D., Danscher, G., Christensen, M. M., Ernst, E. and Møller-Madsen, B., 107
Distribution of saccharides in pig lymph-node high-endothelial venules and associated lymphocytes visualized using fluorescent lectins and confocal microscopy, Whyte, A., Garratt, L., James, P. S. and Binns, R. M., 726
Distribution of calcium in a subset of chronic hibernating myocardium in man, Borgers, M., De Nollin, S., Thoné, F., Wouters, L., Van Vaeck, L. and Flameng, W., 312

0018-2214 © 1993 C' apman & Hall

Distribution of blood-group-related carbohydrate antigens on oral endothelial cells, Bryne, M., Lilleholt, S., Thrane, P. S., Koppang, H. S. and Dabelsteen, E., 339
Distribution of taurine-like immunoreactivity in the mouse liver during ontogeny and after carbon tetrachloride or phenobarbital intoxication, Ding, W. G., Tooyama, I., Kimura, H., Kuriyama, K. and Ochi, J., 376
Dystrophin-related protein, utrophin, in normal and dystrophic human fetal skeletal muscle, Clerk, A., Morris, G. E., Dubowitz, V., Davies, K. E. and Sewry, C. A., 554

Electron microscopic immunocytochemical demonstration of blood-retinal barrier breakdown in human diabetics and its association with aldose reductase in retinal vascular endothelium and retinal pigment epithelium, Vinores, S. A., Van Niel, E., Swerdloff, J. L. and Campochiaro, P. A., 648
Endocytotic pathways in the melanotroph of the rat pituitary, Bäck, N., Soinila, S. and Virtanen, I., 133
Estimating the initial reaction velocity of a soluble dehydrogenase *in situ*, Nakae, Y. and Stoward, P. J., 199
Evaluation of two approaches to the quantitative histochemical localization of sucrose-P synthase in leaves, Hite, D. R. C. and Outlaw, Jr, W. H., 872
Evolution of prothymosin alpha and proliferating cell nuclear antigen (PCNA) immunoreactivity through the development of rat ovarian follicles, Roson, E., Gallego, R., Carcia-Caballero, T., Fraga, M., Dominguez, F. and Beiras, A., 497
Expression of argyrophilic nucleolar organizer regions (AgNORs) can be used to assess cellular proliferation as shown in rat thymic sections, Carbajo-Perez, E., Alberca, C., Vicente-Villardon, V., Flores, T. and Carbajo, S., 548

Fate of degenerating lactotrophs in rat pituitary gland after interruption of lactation: a histochemical and immunocytochemical study, Orgnero de Gaisán, E. M., Maldonado, C. A. and Aoki, A., 150
Formation of crystalloid inclusions in the small intestine of neonatal pigs: an immunocytochemical study using colloidal gold, Kömüves, L. G., Nichols, B. L., Hutchens, T. W. and Heath, J. P., 19
Fucose expression in skeletal muscle: a lectin histochemical study, Kirkeby, S., Moe, D. and Bøg-Hansen, T. C., 619
Further observations on the morphological alterations of the glomerular capillary wall of the rat kidney caused by chemical and physical agents: standard procedures versus quick-freezing and freeze-substitution, Reale, E. and Luciano, L., 357

Geographical mapping of metabolites in biological tissue with quantitative bioluminescence and single photon imaging, Mueller-Klieser, W. and Walenta, S., 407

Histochemical analysis of rat testicular glycoconjugates. 3. Non-reducing terminal residues in seminiferous tubules, Jones, C. J. P., Morrison, C. A. and Stoddart, R. W., 711
Histochemical localization of oxidized glutathione-catalysing enzymes in human term placenta, Glazyrin, A. L., Kolesnikov, S. I. and Safronov, A. Yu., 45
Histochemical analysis of blood group antigens in human sublingual glands and pancreas. An application of high-performance liquid chromatography to estimate the quantity of galactose liberated from tissue sections by α-galactosidase digestion, Ito, N., Tabata, S., Kawahara, S., Hirano, Y., Nakajima, K., Uchida, K. and Hirota, T., 242
Histochemistry of carbohydrates as performed by physical development procedures review, Yamada, K., 95
Histochemistry and morphology of porcine mast cells, Xu, L. R., Carr, M. M., Bland, A. P. and Hall, G. A., 516

Identification of rabbit eosinophils and heterophils in cutaneous healing wounds, Song, B.-Z., Donoff, R. B., Tsuji, T., Todd, R., Gallagher, G. T. and Wong, D. T. W., 762
Immunofluorescent localization of platelet-activating factor (PAF) in the rat, Hirashima, Y., Kato, R., Endo, S., Takaku, A., Karasawa, K. and Nojima, S., 830
Immunohistochemical detection of strain-specific major histocompatibility complex class I antigens in paraffin-embedded rat osteochondral tissue, Gurusinghe, C. J., Hickey, M. J., Hurley, J. V. and O'Brien, B.McC., 140
Immunohistochemical localization of transforming growth factor α in the major salivary glands of male and female rats, Wu, H. H., Kawamata, H., Wang, D. D. and Oyasu, R., 613
Immunolocalization of renal kallikrein-like substance in rat urinary bladder, Orfila, C., Bompart, G., Lepert, J. C., Suc, J. M. and Girolami, J. P., 664
Immunolocalization of manganese superoxide dismutase in normal and transgenic mice expressing the human enzyme, Oberley, T. D., Coursin, D. B., Cihla, H. P., Oberley, L. W., El-Sayyad, N. and Ho, Y.-S., 267
In situ kinetic measurements of D-amino oxidase in rat liver with respect to its substrate specificity, Frederiks, W. M., Van Noorden, C. J. F., Marx, F., Gallagher, P. T. and Swann, B. P., 578
In situ detection of human Ig light-chain mRNA on formalin-fixed and paraffin-embedded tissue sections using digoxigenin-labelled RNA probes, Pan, L., Happerfield, L. C., Bobrow, L. G. and Isaacson, P. G., 57
In situ glucose-6-phosphate dehydrogenase activity during development of pre-implantation mouse embryos, De Schepper, G. G., Vander Perk, C., Westerveld, A., Oosting, J. and Van Noorden, C. J. F., 299
In situ measurements of enzyme activities in the brain, Kugler, P., 329
Indirect immunofluorescence modified to display two antigens with one light filter, Almahbobi, G. and Hall, P. F., 14
Integrins: cell adhesives and modulators of cell function, Bosman, F. T., 469
Intracellular localization of parvovirus B19 nucleic acid at the ultrastructural level by *in situ* hybridization with digoxigenin-labelled probes, Morey, A. L., Ferguson, D. J. P., Leslie, K. O., Taatjes, D. J. and Fleming, K. A., 421

Kinetic analysis of lactate dehydrogenase *in situ* in mouse liver determined with a quantitative histochemical technique, Nakae, Y. and Stoward, P. J., 206
Kurloff cell ultrastructure after combined formaldehyde-cetylpyridinium chloride fixation and high-iron diamine staining, Landemore, G., Quillec, M., Oulhaj, N. and Izard, J., 64

Localization of substance P and leucine enkephalin in the nerve terminals of the guinea pig paracervical ganglion, Mitchell, B. S. and Stauber, V. V., 144
Localization of immunoreactive tissue kallikrein in the seromucous glands of the human and guinea-pig respiratory tree, Poblete, M. T., Garces, G., Figueroa, C. D. and Bhoola, K. D., 834
Lysosomal storage diseases: mechanisms of enzyme replacement therapy, Bou-Gharios, G., Abraham, D. and Olsen, I., 593

Mast cell immunohistochemistry: non-immunological immunostaining mediated by non-specific $F(ab')_2$-mast cell secretory granule interaction, Schiltz, P. M., Lieber, J., Giorno, R. C. and Claman, H. N., 642
Mechanism of connective tissue techniques I. The effect of dye concentration and staining time on anionic dye procedures[a,b], Reid P. E., Iagallo, M., Nehr, S., Jankunis, M., Morrow, L. and Trueman, L., 821
Methodological aspects on immunohistochemistry in dermatology with special reference to neuronal markers, Ljungberg, A. and Johansson, O., 735
Microwave-assisted staining of mucosal mast cells and granulated intra-epithelial lymphocytes after formalin fixation, Biernacka, D., Szymanska, K., Tomaszewska, A., Grzela, T. and Moskalewski, S., 854

Noradrenergic and acetylcholinesterase-positive nerve fibres of the uterus in sexually immature and cycling rats, Melo, R. C. N. and Machado, C. R. S., 213

Ovalbumin-like immunoreactivity detected in chicken sensory neurons by antibodies to aldehyde-treated ovalbumin, Zhou, X.-F., Williams, R., Vahaviolos, J., Zettler, C. and Rush, R. A., 865

Pelvic ileo-anal reservoirs: a lectin histochemical study, Bahia, S. S., McMahon, R. F. T., Hobbiss, J., Taylor, T. V. and Stoddart, R. W., 392
Potassium-dependent *p*-nitrophenyl phosphatase and carbonic anhydrase reactivities suggest that lymphoid follicles in the large intestine of lambs are lined with a uniform type of epithelial cell distinct from the absorptive epithelium, Aleksandersen, M., Bodahl, E. G. and Landsverk, T., 502
Practical aspects of radio-isotopic *in situ* hybridization on RNA review, Moorman, A. F. M., De Boer, P. A. J., Vermeulen, J. L. M. and Lamers, W. H., 251
Practical suggestions for successful immunoenzyme double-staining experiments review, Van der Loos, C. M., Becker, A. E. and Van den Oorrd, J. J., 1
Presence of lysosomal enzymes in the normal glomerular basement membrane matrix, Singh, A. K., 562
Projections of the guinea-pig paracervical ganglion to pelvic viscera, Mitchell, B. S., Ahmed, E. and Stauber, V. V., 51

Rapid cold fixation of tissue samples by microwave irradiation for use in electron microscopy, Wagenaar, F., Kok, G. L., Broekhuijsen-Davies, J. M. and Pol, J. M. A., 719
Renal immunolocalization of kallikrein in cisplatin nephrotoxicity in rats, Orfila, C., Bompart, G., Lepert, J. C., Suc, J. M. and Girolami, J. P., 772

Semiquantitative immunohistochemical studies of blood group antigen A, B, H, Le^a, Le^b structures and Ii backbone chains in the normal human cervix and in cervical adenocarcinoma, Griffin, N. R. and Wells, M., 228
Single cell analysis of the expression of nuclear protein, SCIP, by fluorescent immunohistochemistry visualized with confocal microscopy, Bögler, O., Entwhistle, A., Kuhn, R., Monuki, E., Lemke, G. and Noble, M., 746
Spatial analysis of intranuclear human repetitive DNA regions by *in situ* hybridization and digital fluorescence microscopy review, Van Dekken, H. and Hulspas, R., 173
Superoxide formation preceding flight muscle histolysis in *Solenopsis*: fine structural cytochemistry and biochemistry, Davis, W. L., Jacoby, B. H., Jones, R. G. and Goodman, D. B. P., 478

The von Kossa reaction for calcium deposits: silver lactate staining increases sensitivity and reduces background, Rungby, J., Kassem, M., Eriksen, E. F. and Danscher, G., 446
The histochemical pattern of mechanically or chemically injured rabbit cornea after aprotinin treatment: relationships with the plasmin concentration of the tear fluid, Čejková, J., Lojda, Z., Dropčová, S. and Kadlecová, D., 438
The effects of storage on the retention of enzyme activity in cryostat sections. A quantitative histochemical study on rat liver, Frederiks, W. M., Ouwerkerk, I. J. M., Bosch, K. S., Marx, F., Kooij, A. and Van Noorden, C. J. F., 119
The discrimination of high-risk HPV types by *in situ* hydridization and the polymerase chain reaction, Herrington, C. S., Anderson, S. M., Graham, A. K. and McGee, J. O'D., 191
The ultrastructural localization of metallothionein in cadmium exposed rat liver, Leyshon-Sørland, K. and Stang, E., 857
The effect of different fixatives and length of fixation time on subsequent AgNOR staining for frozen and paraffin-embedded tissue sections, Rowlands, D. C., Ayres, J. G. and Crocker, J., 123

Thiamine pyrophosphatase activity in secretory cells of the lateral prostate and seminal vesicle of normal and castrated guinea pigs and castrates treated with oestradiol, Tam, C. C. and Wong, Y. C., 77
Tissue distribution of amyloid P component as defined by a monoclonal antibody produced by immunization with human glomerular basement membranes, Al-Mutlaq, H., Wheeler, J., Robertson, H., Watchorn, C. and Morley, A. R., 219

Ultracytochemical localization of particulate guanylate cyclase in rat adrenal gland exposed to simulation by porcine brain natriuretic peptide, Rambotti, M. G., Ercolani, P. and Spreca, A., 384
Ultrastructural localization of lectin-binding sites in different basement membranes, Salamat, M., Götz, W., Werner, J. and Herken, R., 464
Update on proliferation-associated antibodies applicable to formalin-fixed paraffin-embedded tissue and their clinical applications, Yu, C. C.-W. and Filipe, M. I., 843

α-Spectrin in detergent-extracted whole-mount cytoskeletons of chicken embryo heart fibroblasts, Sormunen, R. 678
